Maximum customer satisfaction- We make every decision and measure every outcome based on how well it serves our customers

Jagdamb Farming & Agril. System

Project Overview

Scope of Work

The Organization will concentrate on cultivation using hi-tech technique of hydroponics for a pre-decided tenure & with requirements of basic infrastructure and investment with the motive to help farmers to earn profitable returns and also helps achieve a balance between economic and environmental sustainability. This project we can set up anywhere in India and abroad and will supply vegetables & fruits to the local, national and international markets. The objective of this project is to establish hi-tech cultivation, producing high-quality produce with multiple crops by making use of mineral nutrient solutions, in water, without the support of soil.

Why Hydroponics

- Zero Soil requirement
- Less Water consumption
- Extended growing season
- High Plant density
- Grows all year long
- Better yield per plant
- 4 times more crops
- Lesser pest problem

Grow Bag Technology

Basic requirements for grow bag technology

Jagdamb Farming & Agril. System

Slab Bag Technology
